

Western ECCE App Challenge 2024

In a world driven by technology and innovation, our students, Eunice, Samantha, Rachael (left picture), Mohammad (middle picture), Max and Henry (right picture) have participated the ECCE App Challenge 2024, a national wide annual competition, held by Esri Canada to promote innovation and creativity using GIS technology and Open Data.

From concept to execution, these students proved that with determination and creativity, everything is possible! The winning team will be announced in April! Best wishes to our students!
