Office Hours: Wed 3:30 – 5:30 pm
SSC 2223

Overview:

The course is a survey of the methods and models used to understand human responses to hazards. The tradition of hazards research in geography will be reviewed particularly through the lens of social science. The course will examine both natural and technological hazards and the models for understanding human influences on and responses to hazards.

Objectives:

The objectives of this course are to provide students with:

- an introduction to social science theories of hazards and case examples of disasters
- recognition of the risks to people and the environment caused by hazardous events
- knowledge of hazard planning and management solutions
- enhanced geographical problem solving skills, map reading abilities, and geographic awareness

Readings:

A list of readings will be posted on the course website.

Assessment:

<i>Assessment Method</i>	<i>Date</i>	<i>Value</i>
Assignments	Weekly	10%
Activities	Weekly	5%
Midterm Exam	Oct 22	30%
Essay	Nov 19	20%
Final Exam	TBA	35%

The assignments and activities are practical, interactive applications of course content and will be completed during class time. Detailed information about the essay will be provided early in the semester. The midterm exam will cover material studied from Sep 10 through Oct 15. The final exam is heavily weighted toward material studied in the second half of the semester. Exams will consist of multiple choice, fill in the blank, and short answer questions.
