THE UNIVERSITY OF WESTERN ONTARIO DEPARTMENT OF GEOGRAPHY

GEOGRAPHY 2162A: Planning Sustainable Cities September to December 2015

Lecturer: Sergio Pompilii M.A., Dipl. A.A. Urban Design,

Previously a Member of CIP & OPPI

Office: Room 2223 SSC

Office Hours:

Phone: 519 661-2111 Ext: 82828

Email: spompili@uwo.ca

Lectures: Tuesdays 7:00 - 10:00 pm

Location: Room SSC 3018

Course Title Change:

Formerly "Introduction to Urban and Regional Planning", the new course title emphasizes the need for contained/intensified/environmentally responsible urban areas.

The above provides the scope to instruct how cities have changed, are constantly evolving and the importance of urban sustainability, while protecting our rural and natural features/areas.

The Lecturer, Sergio Pompilii, has been and remains active within the land development field for over 35 years, formerly specializing as a land use planning consultant and now a land investment and development strategist throughout Southwestern Ontario, primarily in the Greater Toronto & Hamilton area.

"Planning Sustainable Cities" also reflects real world urban issues, is current and more likely to lead to career opportunities.

General Course Description:

The objective of this course is to expose the student to the role that land use planning plays within our urban, regional, and rural settings. The first part of the course will define planning and planning theory. Next, there will be discussion on why we need to plan our physical environment, what the public interest is in planning, and determination of the role planners have in the land use approval process. There will also be an initial review of the major stakeholders in

the municipal public decision-making process. Lastly, there will be an outline of the steps in both initiating and completing land use change, as for example, by undertaking the processes of planning through policy formulation, implementation and need to monitor and evaluate the implemented plans and policies.

The course will also establish the setting for land use planning in the Province of Ontario by reviewing both the political and regulatory hierarchies that are in place. This top-down approach will review the forms of local government and identify the key land use regulatory and/or development tools, such as the official plan, zoning by-law, plan of subdivision, land severance, minor variance, site plan, and building permit. The course will also touch on the roles of the key provincial ministries and public bodies that are part of the land use regulatory process.

The next part of the course will discuss the role of urban, regional, and rural planning in our current setting. Emphasis will be placed on the need for a new form of sustainable urbanism. Various alternative development options will be discussed, such as new urbanism, smart growth, gentrification, compact urban form, infill and intensification, mixed-use development, place making, creating healthy and environmentally friendly communities through Leadership in Energy and Environmental Design (LEED) and LEED – Neighbourhood Development (LEED-ND) development projects, redevelopment of brownfield sites, preservation of farmland, environmentally sensitive areas, and healthy/sustainable communities.

The final part of the course will focus on the complex interrelationships that exist between the physical, environmental, economic, social, and built considerations in planning. There will be an examination of the role that Conservation Authorities play in protecting our natural and manmade landscapes. The course will also touch on the key role that municipal servicing plays in determining if land tracts are economically developable.

Throughout the course, students will be encouraged to discuss, debate, and formulate their own opinions of the role the planning field plays within the urban, regional, and rural settings. The objective of the course is to inform students of the local government structure and establish the importance of the land use planning field within the municipal public approval process, regardless of their ultimate career choices. In order to achieve these objectives, regular attendance and active contribution in lectures is required. Students must also complete a group presentation, midterm test, research report, and final exam.

In summary, the overall objective of the course is to equip students, regardless of whether or not they will pursue careers in the land use approval field, to have the tools to assess and, if they choose, possibly play a role in establishing the need for our society to plan sustainable cities.

Course Outline:

Understanding the Meaning of the Word "Planning":

September 15, 2015: Defining Planning and Planning Theory

OWL Readings: Introduction to Structure and Debates of Planning

Theory

September 22, 2015 to September 29, 2015:

Determination of the Public Interest within the Planning Process

Establishing the Role Planners Have in the Determination of Land

Uses within our Urban, Regional, and Rural Areas

Understanding the Decision-Making Environment in the

Determination of Land Use

Initial Identification of the Major Stakeholders within the Land

Use Approval Process

Establishment of the Need to Formulate Plans and/or Policies in

Problem-Solving Critical Thinking before Undertaking Required

Action

Establishment of How Plans and Policies are implemented in the

Planning Process

OWL Reading: Planners as Negotiators

Establishment of the Need to Monitor and Evaluate the

Implemented Plans and Policies in the Land Use Planning Process

Urban, Regional, and Rural Planning within the Province of Ontario:

October 6, 2015 to

November 3, 2015: A Hierarchical Review of Planning from the Federal, Provincial, and

Municipal Levels

Establishment of the Policy Hierarchy in the Province of Ontario

Establishment of the Planning Hierarchy and Horizontal Integration of Planning in the Province of Ontario

Establishment of the Planning System in the Province of Ontario through the Review of the Following:

Upper, Lower, and Single Tier Municipalities

The Municipal Act

The Planning Act

OWL Reading: General Plan Evaluation Criteria

Provincial Policy Statement (PPS)

Ministry of Municipal Affairs and Housing (MMAH)

Ontario Municipal Board (OMB)

Municipal Land Use Development Control

Review of Other Regulatory Provincial Ministries and Public Bodies that Impact Land Use and Development

Internet Links: http://www.london.ca/Planning/Official-Plan-

Online/OfficialPlanOnlinetext.htm

http://www.london.ca/Planning/zoningmap.htm

October 27, 2015: Midterm Test

Role of Urban, Regional, and Rural Planning in Our Current Setting:

November 10, 2015 to

December 1, 2015: The Need to Create Sustainable Urbanism in order to

Respond or Be Accountable to Climate and Environmental

Changes by Creating Alternative Development

Smart Growth, Gentrification, Compact Urban Growth, Infill and Intensification, Mixed Use Development and Place Making, Creating Healthy and Environmentally Friendly Communities through Leadership in Energy and Environmental Design (LEED) and LEED – Neighbourhood Development (LEED-ND) Development Projects, Redevelopment of Brownfield Sites, Preservation of Farmland, and Environmentally Sensitive Areas, and Healthy/Sustainable Communities

Note: Government and Private Interest Initiatives Will Be Cited as Examples of the Viability of These Above

Referenced Land Use Planning Alternatives

Municipal Decision-Making Process in Land Use Planning:

December 8, 2015: Conservation Authorities and Watercourse Controls

Detailed Review of the Major Impact Municipal Servicing Has in the

Determination of Land Uses

Note: Changes to course material and times that it is taught may occur during the

term

Course Tools:

Lecture Based Course – There is no Required Textbook

Supplementary OWL Readings

Course Assignments and Grading:

Group Assignment:

Presentation (5%) & Written Submission (10%): 15%

Midterm Test (October 27, 2015): 25%

Planning Report (December 8, 2015): 25%

Final Exam (TBA): 25%

In Class Short Answer Questions (5%) &

Class Participation (5%): 10%

No electronic devices will be allowed during tests and examinations.

Group Assignment and presentation members will be established by the end of the 4th week. During this time period, a sign-up sheet will be provided and finalized. The PowerPoint component of the Group Assignment will be electronically submitted to me the day before its presentation and the written component is due the date that it is presented.

All students will be required to write the midterm test. There will only be one opportunity to write a make-up midterm test if proper documentation is provided.

Group Assignments and Planning Reports are to be personally handed to the instructor on the due date at the beginning of class. If assignments are not submitted on the due date, there will be an automatic 10% late penalty. In addition, a daily 1% mark deduction (weekends count as one weekday) will apply. Assignments will not be accepted if handed in more than one week after the due date. If reports are submitted outside of class, they must be dropped off at the Geography Office (because they are required to be stamped). Students are required to keep a copy of all materials handed in for the course.

Late penalties will be waived for justifiable medical and humanitarian grounds. In these cases, appropriate documentation must be provided or a mark of zero will be assigned.

Academic Integrity:

"Plagiarism: Students must write their essays and assignments in their own words. Whenever students take an idea, or a passage from another author, they must acknowledge their debt both by using quotation marks where appropriate and by proper referencing such as footnotes or citations. Plagiarism is a major academic offence. Scholastic offences are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence, at the following Web site:

http://www.uwo.ca/univsec/pdf/academic_policies/appeals/scholastic_discipline_undergrad.pdf. "

"All required papers may be subject to submission for textual similarity review to the commercial plagiarism detection software under license to the University for the detection of plagiarism. All papers submitted will be included as source documents in the reference database for the purpose of detecting plagiarism of papers subsequently submitted to the system. Use of

the service is subject to the licensing agreement, currently between The University of Western Ontario and Turnitin.com."
