## 4. Course Objectives

**World Cities** is an introductory course in urban geography that will take a global perspective to consider such pertinent topics as urban planning and design, urban growth and de-growth, sustainability and resilience, poverty, violence, and socio-economic inequality. After laying the theoretical foundations to urbanization and urbanism, the course will take an around-the-world journey to highlight different opportunities and challenges of distinctive world cities such as New York and Shanghai. Students who take this course will be: (1) given lots of active learning opportunities; (2) allowed to experience different cultures and; (3) be challenged to imagine themselves as active participants in the vast global network of urbanized humanity.

## 5. Learning Outcomes

- You will develop a critical understanding of key urban geographical concepts related to world cities.
- You will gain a thorough knowledge of a range of issues that affect world cities from both a case specific and global perspective.
- You will be able to compare the opportunities and constraints of different cities around the world related to the global political-economy.
- You will also be able to apply broad geographic concepts to their understanding of the dynamics of world cities, such as the human-environment impact at multiple scales.

## 6. Evaluation

Evaluation Components	Percentage of Course Grade	Assignment Schedule

Participation is a fundamental part of the learning environment. You will need to be present in all lectures as well as be ready to participate actively in the communal learning. There will be lots of emphasis on active learning and critical thinking. Students will get the most out of lectures by reading the material ahead of time. An individual attendance and participation grade will be awarded based on your attendance, readiness, discussion during class activities, and *iclicker* as well as other electronic forms of participation. (10%)

### 6.2. Weekly quizzes

In order to adequately prepare students for class and exams, a short quiz will be administered before each class starting the second week (January 17) of classes. Students will be expected to read the relevant readings and answer 5 multiple-choice questions. Final grade will be based on the average of 10 quizzes. (10%)

### 6.3. Mini-assignment

Students will actively collaborate in course content creation by compiling the following for a world city region assigned by the instructor: 2 photographs with short descriptions of what they are showing and 4 exam questions/answers based on the course textbook for that particular world city region. (10%)

### 6.4. Research assignment

In mid-January you will be asked to choose a world city to research for the individual research assignment. You will select either one strength or one challenge for that world city and make the case for it. For example, here is one title based on a city's strength: "Ethnic and racial diversity makes Toronto one of the world's greatest cities". Select between 5-10 sources to back your claim which you should lay out in a 5-page article that will also include your references, 2-3 figures (may include pictures, maps, tables or graphics). I will be happy to go over your assignment with you at any stage of preparation. (20%)

### 6.5. Exams

There will be one two-hour mid-term exam (20%) and a three-hour final examination (30%) in Geography 2060. The mid-term will be held on February 14<sup>th</sup> in class. The final examination will be scheduled by the Registrar during the April examination period. The examinations will include questions from material covered in lectures, discussions, assigned readings, and documentaries. The final examination will include material from the entire term but more weight placed on the second part of the term. The format of the examinations will be a combination of multiple choice, fill-in-the-blank, short answer and visual questions.
